Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Acknowledgement is made for the applicant's response and amendment filed on October 11, 2007.

Response to Arguments

Applicant's arguments, see p. 6, paragraph 1, filed October 11, 2007, with respect to the rejection(s) of claim(s) 12, 13, and 15-22 under 102 (b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of a newly found prior art reference.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 12, 13, 15, 16, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over K-Y Jelly.

K-Y Jelly, a well known lubricant produced since 1904, contains no alkali metal salts of metaphosphates and is in the form of a water-based gel composition. Glycerol and hydroxyethyl cellulose are the organic lubricating ingredients.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to use K-Y Jelly to ease vaginal child birthing in a woman because its use as a vaginal and medical lubricant is well known.

Claims 12-14, and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hardy (US 4,981,686).

Hardy teaches a personal lubricant containing one or more of petrolatum, coconut oil, anhydrous lanolin, mineral oil, egg albumen, and stearyl alcohol as lubricants; aloe vera, lanolin, and allantoin as healing agents and sodium lauryl sulfate as an emulsifier and wetting agent (col. 2, lines 5-14). The lubricant is preferably available in a cream form (col. 1, lines 56-57) and the healing agents are intended to promote healing of vaginal tissue if irritation and inflammation are present (col. 1, lines 31-34). An example including weight percentages of the ingredients is taught at line 50 of column 2.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to use the lubricant taught by Hardy to ease vaginal child birthing in a woman. One would have been motivated to do this because the composition taught by Hardy is useful as a vaginal lubricant and additionally contains healing agents.
